

GI Motility & Neurogastroenterology in Clinical Practice

Live Demonstrations and Interactive Meeting With the Experts

Thursday, August 26, 2010 • 7 am – 6 pm • Westin Copley Place, Boston, Massachusetts

Sponsored by the American Neurogastroenterology and Motility Society and the University of Kansas Medical Center Continuing Education

Course Co-Directors: Adil Bharucha, MD, Richard McCallum, MD, John Pandolfino, MD, Henry Parkman, MD, Satish Rao, MD, PHD

Local Organizing Team: Alex Flores, MD, Brad Kuo, MD, Anthony Lembo, MD, Hiroshi Mashimo, MD, PHD, Sam Nurko, MD, MPH

Wednesday, August 25

3:00–6:00 pm Registration

Thursday, August 26

7:00–7:45 am Registration & Continental Breakfast

7:45 am Introduction

Satish Rao, MD, PHD, Course Co-Director

7:55 am Opening Remarks

Michael Camilleri, MD, President ANMS

8:00 am Esophageal and Gastric Motility

Moderator: Hiroshi Mashimo, MD, PHD

8:00–8:20 Normal oropharyngeal and esophageal sensorimotor function

Reza Shaker, MD

8:20–8:40 Disorders of esophageal function: from GERD to achalasia

Peter Kahrilas, MD

8:40–9:00 Normal gastric function: accommodation, sensation, and motility

William Hasler, MD

9:00–9:20 Gastroparesis and functional dyspepsia

Kenneth Koch, MD

9:20–9:40 Panel Discussion; Question and Answer

9:45–10:30 Live demonstration of esophageal motility testing using high-resolution manometry from Beth Israel Medical Center GI Motility Laboratory

Presenters: John Pandolfino, MD and Anthony Lembo, MD

Moderators: Henry Parkman, MD and Peter Kahrilas, MD

10:30–10:45 Break

Concurrent Interactive Workshops

Two sessions: 10:45–11:30 and 11:30–12:15

There are three 45-minute workshops per session. Each workshop is repeated. Choose one workshop per session.

1. Testing for gastric emptying and motility: scintigraphy, breath testing, capsule motility, and EGG

Richard McCallum, MD (scintigraphy), Larry Szarka, MD (breath), Brad Kuo, MD (capsule), Ken Koch, MD (EGG)

2. Testing for GERD: catheter, Bravo, and impedance testing

Michael Vaezi, MD (catheter pH), Prakash Gyawali, MD, MRCP (Bravo pH), Ronnie Fass, MD (impedance pH),

3. Challenging patients with esophageal and upper GI motility disorders

Participants are encouraged to present their patients to Reza Shaker, MD (oropharyngeal), Peter Kahrilas, MD (esophageal), and William Hasler, MD (gastric and small bowel).

12:30–1:30 pm Lunch: Meet the Professor

1:30 pm Intestinal and Anorectal Motility

Moderator: Alex Flores, MD

1:30–1:50 Disorders of small intestinal motility: evaluation and treatment of CIIP and SIBO

Ann Ouyang, MD

1:50–2:10 Spectrum of colonic disorders: IBS, constipation, and motility disorders

Michael Camilleri, MD

2:10–2:30 Functional anorectal disorders

Adil Bharucha, MD

2:30–2:50 GI motility and functional GI disorders in adolescents

Hayat Mousa, MD

2:50–3:10 Panel Discussion; Question and Answer

3:15–4:00 Live demonstration of anorectal manometry from Beth Israel Medical Center GI Motility Laboratory

Presenters: Satish Rao, MD and Anthony Lembo, MD

Moderators: Adil Bharucha, MD and Sam Nurko, MD, MPH

4:00–4:15 Break

Concurrent Interactive Workshops

Two sessions: 4:15–5:00 and 5:00–5:45

There are three 45-minute workshops per session. Each workshop is repeated. Choose one workshop per session.

1. Assessing colonic transit: radiopaque markers, scintigraphy, capsule pH/pressure

Richard Saad, MD (markers), Michael Camilleri, MD (scintigraphy), Henry Parkman, MD (capsule)

2. Testing for bacterial overgrowth, IBS, and carbohydrate intolerance

Mark Pimentel, MD (bacterial overgrowth), Lin Chang, MD (IBS), Bill Chey, MD (CHO intolerance)

3. Biofeedback and sacral nerve stimulation for incontinence and constipation

John Coller, MD (SNS), William Whitehead, PHD (adult biofeedback), Sam Nurko, MD, MPH (pediatric)

6:00 pm Reception
